

App screenshot coverage

Which modules have real screens from the Antz app, which use stand-ins, and exactly which screens still need to be captured. Checked against every feature in the site's content file and every image on disk, 29 September 2026.

37

modules in the content file

4

web modules showing a stock photo instead of a screen

8

features showing another feature's screen (reused or duplicate file)

44

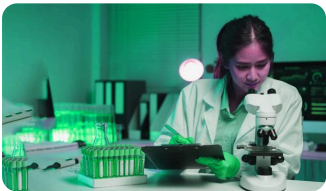

screenshots to capture to complete the guide

1

Stand-ins: stock photos, not app screens

HIGH

These four web modules have one image each, and it is a stock photo. None of their other features has a screen. On the site, every one of their 31 features opens that same photo as if it were the app.

Lab
Scientist at a microscope · 0 of 8 real

Diet
A pile of fruit · 0 of 6 real

Pharmacy · Web
Pills in a trolley · 0 of 8 real

Compliance
Vet with a tablet · 0 of 9 real

Recommendation: remove the four photos until real screens exist, and show “Screens coming soon” instead.

2

Modules missing most of their screens

MEDIUM

Getting Started has a screen for 1 of its 6 features (the home screen). The other five have none. **Objective of this kit** and **What is Antz Systems?** have no screens, which is expected for introduction pages.

3

One image for different features

MEDIUM

Each feature describes something different but shows the same image.

MODULE	FEATURES	IMAGES
HIMS · App	4	2
Reports · Web	2	1
Tags Hub	8	7

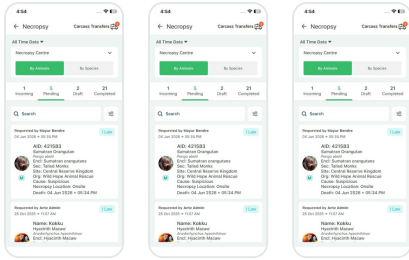

4

Duplicate files

MEDIUM

Byte-identical copies saved under different names, so features look like they have their own screen but do not.

MODULE	FEATURES SHOWING ONE PICTURE
Necropsy	3 (Search & filters, Status tracking, Animal card)
Mortality	2 (Advanced search, Deceased records)
Fetal Death	2 (Animal card display, Edit record)

Necropsy: three different features, one identical screen. The same pattern repeats in Mortality and Fetal Death.

5 Not on the site yet LOW

Chat and **Focus Hub** are marked “needs content” and have no features or screens, so the site hides them. They need written content before screens are useful.

Mobile and web at a glance

GROUP	MODULES	SCREENS
Mobile app modules	22	Real phone screenshots throughout, apart from the reuse and duplicates in sections 3 and 4
Web modules with real web screens	3	Egg Management · Web, Reports · Web, HIMS · Web (HIMS uses iPad-sized captures of the web app)
Web modules with no real screens	4	Lab, Diet, Pharmacy · Web, Compliance (stock photos)
Introduction pages	3	Objective, What is Antz Systems?, Getting Started (1 screen)
Hidden, need content	2	Chat, Focus Hub

To complete the guide: 44 screenshots. 31 for the four web modules, 5 for Getting Started and 8 to replace reused or duplicate images, plus written content for Chat and Focus Hub. The checklist that follows lists each one by module and feature.
